card or USB/FTDI
Soldering connectors/wire
Mounting Nextion and board in your own enclosure

This K3NG based computer interface controller suits a Yaesu G-5500 type dual Az/El rotator controller for operators who want a practical and powerful interface, along with the ability to access spare MCU I/O ports for future experimentation.

Pre-assembled and tested (factory MCU removed after testing) and ready for you to complete the integration into your own system requirements.

- Yaesu G-5500 compatible for CW/CCW/Up/Down control
- PCB 100 x 50mm
- Accommodates Teensy 3.2 MCU (not supplied)
- Nextion (not supplied) touchscreen interface (free Nextion firmware **by VK4GHZ**)
- Generic azimuth only rotator control compatible
- Az and El analogue potentiometer inputs
- Piezo audible alert output
- Teensy Real Time Clock battery connection
- 4 x N.O. generic push-button switch inputs with pull-ups ie; as remote CW/CCW/Up/Down control lines
- GPS serial data pass-through (genuine FTDI chip) to USB Mini-B for time-syncing PC
- High efficiency DC-DC Buck 7805 Regulator

International Extra Cover
$4.00

What's in the box?

1 x assembled and tested controller board

1 x 8-pin DIN connector (to G-5500)

1 x 4-pin min DIN connector (to GPS)

2 x Polarised 2-pin connectors (to audible alert piezo, RTC battery backup)

What you supply

• Teensy 3.2 MCU (K3NG rotator controller firmware available **from Github**)

• Nextion HMI of your choice (free firmware for 3.5” or 5.0” **by VK4GHZ**)

• An enclosure to suit your own requirements

• Interconnection wire to suit your own requirements

• GPS Module (serial 9600Bd NMEA)

Will this work with a G-5400?

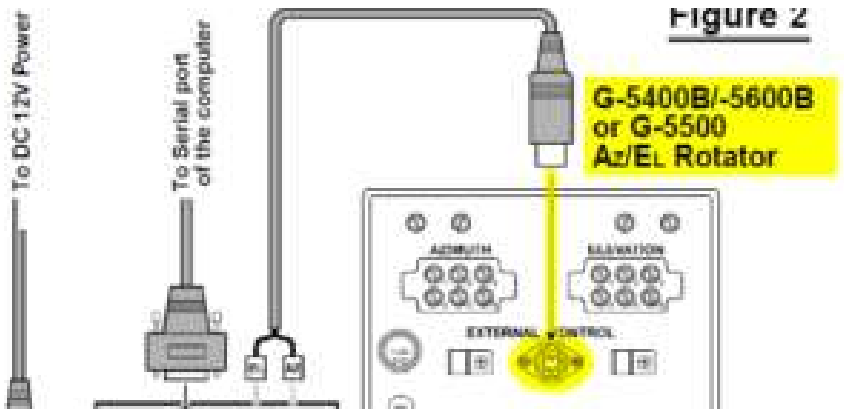

Figure 2

Will VK4GHZ K3NG Controller Boards Work With Other Rotators?

Will the VK4GHZ K3NG-based controller boards work with a Yaesu G-5400 and G-5600 system, or anything else? I've been asked this on more than one occasion! Short answer: Yes the G-5400, G-5600 and G-5500DC will. Long answer: The answer … Continue reading
